

SPECIAL ANNOUNCEMENT

New ARS Regular Members to Receive Complimentary Desk Copy of 'Rose Atlas'

FEW Sample Section Headers

Contents Directory Map

Replacing the reference index sections usually printed at the very end of a book, a detailed page by page contents directory is provided to allow the reader to quickly scan the menu of subject areas to find topics and exact pages of their interests.

Twenty-five Sections displayed with colorful headers are in sequential order. Towards the later sections on subjects associated with Rose Science receive attention

Authors

Tommy and Luis are iconic personalities not only within the American Rose Society (ARS) but also on the world rose stage. Their experiences span over 4-5 decades. Both have received the ARS Gold Honor Medal, the Klima Medal for Excellence in Education and the Blake Hedrick Award.

Contents

With over 50 years of growing, showing and writing about roses their commitment to assemble an authoritative treatise devoted to capturing and sharing their combined knowledge has resulted in the production of an educational monograph and comprehensive compendium. Focusing on providing a wealth of graphical illustrations and images, the accompanying text dialog focused on every page deals with a topic on roses within the 25 main subject areas.

Rose Science has emerged as an important feature in understanding the elements recommended in the practice of rose horticulture. Opening sections feature basic principles while later sections are fortified with the science assembled in a simple understandable language.

This authoritative and educational compendium will be of interest not only to beginners but also to established rose gardeners. Promotion of the immense joys of rose growing has been highlighted over the past few years more so than ever before because science horticultural knowledge has become more popular.
